## OVERVIEW

Goldwyn Limited is an ISO 9001 : 2015 quality certified company engaged in the design and manufacturing of LED lights.

Goldwyn offers a wide range of modern, aesthetically designed and energy efficient LED lights for external and internal applications. Our LED lights have high reliability built into the design through years of research and development.

Goldwyn ensures high quality by controlling the design and manufacture of critical components such as electronic drivers and optical lenses at our plant. Goldwyn's lights undergo rigorous testing for extreme temperature and humidity conditions to ensure reliability in all operating conditions. Our design philosophy is to ensure that Goldwyn's lights withstand extreme power supply conditions of over voltage and surges.

Goldwyn has a state-of-the-art photometric laboratory which enables us to monitor all critical parameters of LED lights. Goldwyn is able to deliver lighting files for every type of LED light that we design and manufacture. The lighting files help customers and architects to plan the placement of lights for best results.

Our range of LED lights covers most of the outdoor and indoor applications in everyday life. Goldwyn also serves large projects by custom designing LED lights to suit demanding applications.

Goldwyn lights are aesthetic, reliable, safe, energy efficient, non-toxic, and environmental friendly. We are proud to be a part of the international effort to deliver lighting solutions that saves energy and protects the environment.

## DESIGN & DEVELOPMENT

Our LED lights have been designed and developed in-house. Our mechanical engineers equipped with CAD workstations take every care to design new lights to ensure that the lights meet the best manufacturing and quality standards. Thermal simulations ensure that the thermal management is optimum for the long life of the LED luminaries.

Mechanical Design

Our in-house tool making ability allows us in making high quality tools in short time. This helps us in introducing new parts quickly and of highest quality.

Tool Making

Goldwyn designs its own electronic drivers for use in our vast range of LED lights. High quality and reliability of the drivers is ensured right from the design stage. Advanced features of our drivers ensure that we remain at the forefront of LED technology.

Electronic Design of Drivers

## MANUFACTURING FACILITIES

All plastic parts including lenses are injection moulded in-house. This provides us with the best quality and finish in the moulded parts for better light output.

Injection Moulding of Lenses

The powder coating facility has comprehensive seven stage process of degreasing, water rinse, surface activation, phosphating or chromate, water rinse and passivation. The powder is charged by an electrostatic spray gun. The curing oven with controlled temperature ensures high finish.

Powder Coating

The best-in-class SMD assembler from Juki is used for all SMD mounting. All the drivers designed and developed in-house and light engines are populated automatically ensuring reliability of the drivers and the light engines.

SMD Assembly for Drivers & LED's

# ASSEMBLY PLANT

Highly skilled technicians assemble reliable and robust drivers using the latest testing and assembly equipment.

Driver Assembly

Trained technicians assemble luminaires using on-line automation and testing and produce high quality lights efficiently.

Light Assembly

A modern and efficient warehouse equipped with automatic storage system for electronic components ensure that the raw materials and finished products are stored in the best condition.

Warehouse

# TEST LABS

Our Photometric Laboratory is equipped with best-in-class Integrating Sphere and Goniophotometer. Measurements of LED luminaires are done to ensure high performance of lights. We carry out measurements for light distribution pattern, illuminance, luminous flux, chromaticity, color temperature, color rendering index to applicable standard LM79 & LM80.

Photometry

Electromagnetic Interference (EMI) and Electromagnetic Compatibility (EMC) are important considerations while designing lighting products. During development and regular production we ensure that our products comply with international standard EN55015 to meet sensitive usage conditions.

EMI & EMC

Safety tests are conducted on all new lights for high voltage, Leakage current and insulation resistance as prescribed under respective standards. Surge, Burst, Voltage dips tests are carried out from 0 to 4 KV to ensure robust electrical design to standard IEC 60598 and IEC 61547.

## LUMI Dot Pixel 1

IP  
65

Standard outdoor dot pixel lighting (dot light) system, designed for the realization of self-luminous lighting effects for building facades and structural surface. It uses different installation accessories to bring out the ideal combination of curtain well structures. Optical design, special asymmetric light distribution design not only ensures the brightness of the surface, but also reduces light pollution by decreasing the light output above the horizontal direction, which economically saves energy by improving the utilization of overall light output.

Flicker free operation for broadcast TV and FILM	

Today more and more moving heads are being exposed to wet, humid and extreme conditions. With numerous multi-environmental application requirements, Color Imagination recently launched an IP65 rated hybrid LED moving head with CMY+CTO system which integrates BEAM, SPOT and WASH in one fixture, featuring linear zoom ranging from 4° to 45°.

The SPOT features a new high intensity and efficiency cool white 550W LED engine (8500K) delivering a total of 22200 lumens for ultra high light output through a set of high resolution and precise optics that helps to provide extremely clear and even spot coverage.

## SMART POLES

**Weather Station System**  
Collect and send data to monitoring center by concentrator, such as weather, temperature, humidity, lighting, PM2.5, noise, rainfall, wind speed, etc.

**Smart Lighting Controlling System**  
Remotely control (ON/OFF, dimming, data collecting, alarm etc.) in real time by computer, mobile phone, PC, PAD, support communication modes like NB-IoT, LoRa, Zigbee etc.

**Information Publishing System**  
Display the advertisement, public information in words, pictures, videos by remote uploading, high efficient and convenient.

**Mini Basestation**

**Cameras & Surveillance System**  
Monitor traffic, security lighting, public equipments through cameras & surveillance system on the pole.

**Wireless AP System**  
Support WIFI hotspot in city.

**DSRC Vehicle Monitoring System**  
Set up a smart traffic IoT platform to promote traffic safety, improve traffic condition in bad weather, coordinate vehicles and optimize the traffic.

**Emergency Call System**  
Connect directly to command center, respond quickly to emergency public security affair and position it.

**AC Charge Pile**  
Offer more charging stations for new energy vehicles, make it easier for people travelling and speed up the popularization of new energy vehicles.

#### Applications

- Street Lighting
- Campus Area Lighting
- Parking Area Lighting
- Rural Lighting
- Perimeter Lighting

#### Features

- Autonomy for 2 days
- Electronic blocking to protect against reverse polarity
- Temperature compensation for battery charging
- Fuse for reverse polarity protection of battery
- LED indication systems for system and battery status
- Efficient overcharge and deep discharge protection
- Electronic overload protection
- Short circuit protection on load side
- Multi level overload protection
- Low battery cut off

### Applications

- Security Lighting
- Construction Sites
- Railway Yards
- Open Cast Mines
- Shipyards
- Airport Aprons
- Oil Storage Depots
- Highway Crossings
- Industrial Sheds
- Warehouses

### Features

- Mounting: Surface/ Suspended
- Housing: High grade extruded aluminium
- Modular built concept with IP rated cluster lenses
- High efficiency PMMA/PC lens for excellent light distribution
- Best in class power LEDs
- Inbuilt electronic driver
- Standard Body Colour : Black
- Customized Beam angle

### Mechanical Features

Product Code	Input Power	System Lumens for 6000K
