3 Steps Dimming

3 STEP SWITCH FOR DIMMING DOWNLIGHT

SWITCH CYCLE V/S LED BRIGHTNESS

GOLDWYN'S new 3 Step Switch is a unique way of dimming by just turning ON and OFF the wall switch. The first cycle corresponds to 100% LED brightness followed by the second and third cycle corresponding to 40% and 14% LED brightness respectively. This energy efficient switch also comes with overvoltage protection, open circuit protection, short circuit protection and thermal shutdown.

Application : In conjunction with **ECO** and **QUADRA** Downlight

- **No Separate Device Needed for Dimming**
- Operating Voltage Range : 110VAC - 265VAC
- Power Factor @ 230 V AC : > 0.9 (at full intensity)
- Efficiency : > 85% (at full intensity)
- THD : < 16%
- Current Regulation
- Zero Installation Cost
- In-built dimming reduces BOM cost
- No "Dead travel", "Pop corn", Flicker, related to dimmer
- No compatibility issue of switch "TYPE"
