

3 STEP SWITCH

For Dimming Downlight

Goldwyn's new 3 Step Switch is a unique way of dimming by just turning ON and OFF the wall switch. The first cycle corresponds to 100% LED brightness followed by the second and third cycle corresponding to 40% and 14% LED brightness respectively. This energy efficient switch also comes with overvoltage protection, open circuit protection, short circuit protection and thermal shutdown.

FEATURES

- No Seperate Device Needed for Dimming.
- Current Regulation.
- Zero Installation Cost.
- Inbuilt dimming reduces BOM cost.
- No "Dead Travel", "Pop Corn", Flicker, related to dimmer.
- No compatibility issue of switch "Type".

SPECIFICATIONS

Operating Voltage Range	110V AC – 256V AC
Power Factor @230 VAC	> 0.9 (at full intensity)
Efficiency	>85% (at full intensity)
THD	<16%
